-

- Implementation of SharePoint 2010 server farm and FAST Search Server 2010 for SharePoint to provide enterprise wide federated search capabilities.

Project: Omnicom Group (*Code, Harrison & Star, BioLumina*) (NYSE: OMC)

- Omnicom Group is a global advertising and marketing communications holding company with over 200 subsidiaries.
- Development of SharePoint portals with extensive workflow capabilities to manage client projects.

Project: *St. Luke's-Roosevelt Hospital Center*

- St. Luke's is a 1076 bed, full-service hospital serving Manhattan's west side.
- Developed internet site for administering studies for the Neuro-Ophthalmology Research Disease Investigator Consortium. MOSS 2007 with FBA (Forms Based Authentication), InfoPath forms and custom workflows.

Project: *Merial*

- Merial is an animal health pharmaceutical company with 5,400 employees in over 150 countries and 2008 sales of \$2.6 billion. Merial is a joint venture between Merck and sanofi-aventis.
- Lead architect of global roll-out of MOSS 2007 and migration from Tibco PortalBuilder and Documentum eRoom. Integration between Documentum and SharePoint.
- Global deployment with central server farm in Atlanta, Disaster Recovery (DR) farm in DC, and regional farms in Europe and Asia.

Project: *Merck - Schering-Plough* (NYSE: MRK,SGP)

- Merck is a global pharmaceutical company with 55,000 employees and revenues of \$24 billion. Schering-Plough is a pharmaceutical company with 51,000 employees and revenues of \$18.5 billion.
- SharePoint architect responsible for architecting components of OneMerck global intranet portal. Utilized Business Data Catalog (BDC) for importing user profile data from Oracle ERP system into MOSS.

Project: *Advent Capital Management*

- Advent is a financial company that specializes in convertibles, equities and high yield strategies. The firm manages approximately \$3.5 billion in long-only products, hedge funds and closed-end mutual funds.
- Delivered SharePoint training to users and administrators.
- Implemented and configured SharePoint 2007 Intranet for document management and collaboration.

Project: *Signature Bank* (NASDAQ: SBNY)

- Signature Bank (Signature) is a New York-based, full-service commercial bank with over 20 private client offices located in the New York metropolitan area serving the needs of privately owned business clients. The bank has 500 employees and over \$6.7 billion in assets.
- Migrated SharePoint 2003 corporate intranet to MOSS 2007 medium server farm. Set up extranet for clients using forms based authentication (FBA) and ADAM. Deployed SQL Server Reporting Services for generation of reports. Developed InfoPath forms, custom workflows, web parts and event handlers.

Project: *Monster Worldwide* (NYSE: MWW)

- Monster, the primary operating unit of Monster Worldwide, headlines a leading network of online career services. Monster has approximately 5,200 employees and operations in 36 countries.
- Implemented MOSS for corporate intranet and collaboration. Setup 64 bit medium server farm with Kerberos. Used BDC for importing user profiles from PeopleSoft. Set up content deployment architecture.

Project: *BlueWater Communications*

- BlueWater is a Cisco Gold Partner with Advanced Certifications in Unified Communications, Security, Wireless, Routing & Switching and Data Center Technologies.
 - Implemented MOSS 2007 for corporate intranet, document management and project management. Developed application to consolidate sales rep reports.
-

Project: *International Power (LSE: IPR.L)*

- International Power is an independent power generation company with interests in over 40 power stations and some closely linked businesses around the world.
- Performed analysis of corporate Intranet and wrote architecture/recommendations report. Redesign and branding of corporate intranet portal in Windows SharePoint Services 3.

Project: *Procter & Gamble (NYSE: PG)*

- Procter & Gamble is a Fortune 500 company that manufactures a wide range of consumer goods under brands such as Gillette, Tide and Duracell. The company has over 135,000 employees in 80 countries with annual revenues of \$75 billion in 2007.
- Lead architect of multi-million dollar project to build digital asset management extranet application for managing the adaptation of TV commercials in languages/countries all over the world. Application was developed using MOSS 2007 in a medium server farm configuration. Extensive use of personalization, branding, custom web parts, content types, Infopath forms, and custom workflows using Windows Workflow Foundation.

Project: *GE (NYSE: GE)*

- GE is a technology and services multinational conglomerate. It is the world's second largest company with 310,000 employees in 160 countries and revenues of \$163 billion.
- Developed portal in MOSS 2007 for people worldwide to collaborate and manage advertising assets such as images, audio and videos.

Project: *NORC*

- NORC is a national organization for research at the University of Chicago, with offices in Chicago and in Washington DC, as well as nationwide field staff
- Lead architect for implementation of Microsoft Office SharePoint Server 2007 for corporate intranet, document management, internal and external (extranet) collaboration

Project: *Dover Corporation (NYSE: DOV)*

- Dover Corporation is a diversified industrial manufacturer with over \$6.0 billion in annualized revenues from operating companies that manufacture specialized industrial products and equipment
- Implementation of Microsoft Office SharePoint Server 2007 Beta for corporate intranet, document management, collaboration

Project: *OMD*

- OMD is a subsidiary of the media services division of Omnicom Group, Inc. Omnicom is a leading global company that provides advertising, strategic media planning and buying, direct and promotional marketing, public relations and other specialty communications services to over 5,000 clients in more than 100 countries.
- Developed collaboration and digital asset management system based on SharePoint 2003, K2.Net 2003 and SQL Reporting Services

Project: *IPC*

- IPC Systems is a leading provider of mission-critical communications solutions to the world's largest financial services firms. IPC offers its customers a suite of products and enhanced services that includes advanced Voice over IP technology, and integrated network and management services to 50 countries.
 - Information worker project to integrate back office business systems with Microsoft Office applications using Information Bridge Framework (IBF). Developed smart tags in Office applications (Outlook, Word, Excel, Infopath) to automatically retrieve client data through a web service that was developed to query data from a SQL Server database. The end result was that a worker could open a Word document and all the occurrences of a client name or order number would be underlined and with a click they could obtain information about that client in a pane inside of Word.
-

Project: *HarperCollins Publishers*

- HarperCollins Publishers is one of the world's leading English-language publishers with headquarters in New York. The company is a subsidiary of News Corporation with revenues that top \$1 billion annually and over 3100 employees worldwide.
- Developed solution to automate the book creation/publication process using SharePoint 2003 and K2.Net 2003. The end result was a sophisticated workflow system that tracked and managed the publication of a book as it passed through several different departments. The system reduced the overall time to publish a book and provided better visibility into the entire process for management.

Project: *TJX (NYSE: TJX)*

- The TJX Companies, Inc. is the leading off-price apparel and home fashions retailer in the U.S. and worldwide, with \$16 billion in revenues in 2005, eight businesses, and more than 2,300 stores, and ranked 138th in the most recent Fortune 500 rankings. TJX's off-price concepts include T.J.Maxx, Marshalls, HomeGoods, and A.J. Wright, in the U.S., Winners and HomeSense in Canada, and T.K. Maxx in Europe.
- Created SharePoint site for aggregating information collected in InfoPath forms into a report in Microsoft Word. Users would fill out status reports in InfoPath forms and submit them to the SharePoint site. A custom web part was developed to aggregate all the data from the InfoPath form library into one large XML file. The aggregated XML data would then be transformed into a Word file using WordML.

Project: *Vanguard*

- The Vanguard Group is the second-largest mutual fund firm in the US and a leading provider of company-sponsored retirement plan services. Vanguard manages more than \$990 billion in U.S. mutual fund assets, including more than \$275 billion in employer-sponsored retirement plans. Vanguard offers more than 130 funds to U.S. investors and more than 40 additional funds in foreign markets.
- Customization of SharePoint site definitions with Vanguard branding

Project: *Phillip Morris (NYSE: PM)*

- Philip Morris held a 15.5% share of the international cigarette market in 2005. Its brands, led by Marlboro and L&M, are sold in over 160 countries around the world. Philip Morris International is an operating company of Altria Group, Inc.
- Proof of concept (POC) SharePoint business intelligence solution for tracking Human Resources InfoPath forms developed using SharePoint 2003, SQL Server Reporting Services, InfoPath 2003

Project: *Educational Testing Service (ETS)*

- ETS is the world's largest private educational testing and measurement organization with over 3000 employees
- Technical lead for company-wide SharePoint 2003 Implementation
- Involved in all phases of implementation including requirements gathering, design, development, testing, deployment, and training
- Installed and configured SharePoint in multiple environments (development, testing, production)
- Migrated SharePoint sites from test server to production
- Customized SharePoint for ETS including custom lists, web parts, themes and site templates
- Researched and tested workflow and other third party products for SharePoint
- Attended regular project meetings with business stakeholders and helped develop best practices
- Created documentation and trained administrators and tech support personnel in SharePoint
- Created SharePoint support site for users to use as a knowledge base

Project: *Ministry of Health and Long-Term Care, Smart Systems for Health Agency*

- Smart Systems for Health Agency (SSHA) is an agency of the Ontario Ministry of Health and Long-Term Care that electronically connects Ontario health care professionals to patient information and provides various technology solutions in the health care sector
 - Technical manager of corporate Intranet and document management system implemented with Microsoft SharePoint Portal
 - Gathered requirements from various departments and constructed departmental portals
-

- Developed and maintained web pages and web parts using HTML, ASP, VBScript, XML and XSL
- Created migration plan for moving from SharePoint Portal Server 2001 to SharePoint Portal Server 2003
- Architected 24/7 high availability architecture for SharePoint Portal Server 2003 and SQL Server
- Implemented and configured Microsoft SharePoint Portal 2003, Windows SharePoint Services and MS SQL Server 2000.
- Created knowledge base portal for contact center agents
- Member of five person team designing and developing the public Internet web site using HTML, CSS and JavaScript

Project: *Microsoft (NASDAQ: MSFT)*

- Worked with Microsoft to deploy proof of concept SharePoint implementation
- Implemented new version of SharePoint Portal Server 2003 and Windows SharePoint Services
- Customized SharePoint site templates and menus
- Developed custom functionality such as document upload and document move with the SharePoint API using ASP.Net and C#

Project: *Ministry of Health and Long-Term Care, Smart Systems for Health Agency*

- Member of four-person team implementing Intranet portal to allow employees to share information and documents, collaborate and improve communications
- Designed solution using Microsoft SharePoint Portal Server 2001, SharePoint Team Services and digital dashboard technology
- Implemented and configured SharePoint Portal Server and Team Services
- Created web pages and web parts using HTML, ASP, VBScript, XML and XSL
- Designed and developed data architecture in Microsoft SQL Server database
- Programmed ASP pages to access and update data from database
- Set up WebTrends to analyze web traffic and generate reports
- Designed and hand-coded HTML for bilingual Internet web site to be cross-browser compatible and compliant with government standards
- Created graphics for web site using Adobe Photoshop
- Developed training material and conducted training sessions to end users

Vice President

2000

division i, Toronto, Ontario

- Co-founded interactive services consulting firm and managed daily operations of company
- Wrote proposals and delivered sales presentations to potential clients
- Launched web hosting and domain name registration business
- Designed eBusiness strategies for clients to achieve maximum benefit from internet initiatives
- Developed web sites and applications for clients using HTML, CSS, JavaScript, ASP, Access, Flash

Internet Software Developer

1999

drugstore.com, Seattle, Washington

- Wrote specifications for integrating merchandising system with warehouse management system
- Maintained database schema for front-end and back-end system
- Constructed message parsing and delivery system
- Developed several objects to encapsulate various complex data structures and to communicate with mainframe

Web Application Developer

1999

Manulife Financial, eCommerce Centre of Excellence, Toronto, Ontario

- Member of team developing secure web site for group pension clients to manage portfolios online
 - Investigated and implemented a virtual host web server to host multiple sites on one machine, thereby resulting in significant cost savings
-

Business Systems Developer

1998

Husky Injection Molding Systems, Dudelange, Luxembourg

- Project Manager of manufacturing business system with hundreds of users
- Developed and maintained system using VB, Microsoft Access
- Implemented Baan IV (using Baan Tools) and Baan Sync Scheduler
- Integrated manufacturing business system with Baan Sync Scheduler
- Conducted training classes and trained end users on how to use Baan Sync
- Reported monthly progress and made presentations to management on project

Software Engineer

1997

Northern Digital Inc, Waterloo, Ontario

- Designed and developed windows software application to improve efficiency of manufacturing process
- Developed application using object oriented design methodology
- Interfaced software with external hardware to collect 3D data and to program SROMs
- Created internal state machines to make application multi-threaded

Consultant

1996

KPMG Consulting, Strategic & Technology Services, Toronto, Ontario

- Provided IT management consulting services to corporate clients
- Conducted Business Process Re-Engineering project and testing of financial planning and reporting system for leading financial institution
- Managed Information Risk Management & Compliance project for insurance company
- Advised clients in System Selection and Implementation projects
- Developed interactive Baan ERP implementation methodology tool-kit

EDUCATION

Bachelor of Applied Science Honors in Systems Design Engineering

2001

University of Waterloo

- Courses in Software Design, Data Structures and Algorithms, Systems Analysis, Distributed Systems, Databases, Artificial Intelligence, Numerical Methods, Simulation of Systems, Digital Circuits

INTERESTS AND ACTIVITIES
